

"METRONIDAZOLE PLEDGETS"
ABSTRACT OF THE DISCLOSURE

A dermatological delivery system comprising a topically
5 acceptable, inert support selected from the group consisting of cotton,
rayon, polyester, polypropylene, wood pulp, mohair, nylon fleece, and
neoprene foam, or combination thereof, impregnated with an about 0.1%
to about 2% solution of metronidazole; the solution having a major
solvent component comprising water, ethanol or a mixture of water and
10 ethanol, the support being operable to permit application of the solution
to the skin.
